

Press Release – For Immediate Release

BroadLight Awarded ISO 9001:2000 Certification for Outstanding Operations and R&D Processes

ISO Certification Demonstrates BroadLight's Commitment to Deliver the Highest Quality PON Solutions to Equipment Providers Worldwide

May 2, 2005 – Mountain View, Calif. – BroadLight, Inc., a leading supplier of semiconductors, software and transceivers for FTTP deployments, today announced it has been awarded the prestigious ISO 9001-2000 certification from the Standards Institution of Israel (SII). The company received this award following an extensive review of its internal operations and R&D processes – all of which met or exceeded the rigorous quality standards set forth by the International Organization for Standardization (ISO).

“We are proud to be an ISO 9001:2000 certified company because it demonstrates our commitment to quality and reliability in all aspects of our business,” said Raanan Gewirtzman, general manager of BroadLight’s Israel operations. “This focus on quality also reinforces our goal of being a key strategic partner and trusted supplier of PON solutions to all of our customers, all of the time.”

ISO 9001:2000 is an international standard that gives requirements for an organization’s Quality Management System (“QMS”). The objective of ISO 9001:2000 is to provide a set of requirements that, if they are effectively implemented, provide companies with confidence that the supplier can consistently provide goods and services that meet the needs and expectations and Comply with applicable regulations. The requirements cover a wide range of topics, including top management commitment to quality, its customer focus, adequacy of its resources, employee competence, process management (for production, service delivery and relevant administrative and support processes), quality planning, product design, review of incoming orders, purchasing, monitoring and measurement of its processes and products, calibration of measuring equipment, processes to resolve customer complaints, corrective/preventive actions and a requirement to drive continual improvement of the QMS. Last but not least, there is a requirement to monitor customer perceptions about the quality of the goods and services it provides.

About BroadLight, Inc.

BroadLight delivers the industry's only end-to-end solution (from the customer premises to the central office) for equipment vendors designing passive optical networks (PONs.) The company's completely integrated product line consists of standards-based digital and analog optical transceivers, communication semiconductors and software solutions that enable its customers to deliver ITU-T PON equipment to carriers and services providers worldwide. This end-to-end solution provides customers with a lower risk development cycle and enables them to significantly speed time-to-market. As a result, BroadLight technology has been adopted by leading manufacturers who are currently providing equipment for the some of the world's largest fiber PON roll-outs.
