## **BroadLight Expands Worldwide Presence into Australia and New Zealand**

**July 19, 2010 – Santa Clara, Calif.** – BroadLight, the leading supplier of Smart Fiber Access Processors, announced today that it has signed a distribution agreement with Braemac, who will be representing BroadLight in Australia and New Zealand.

The local governments in both Australia and New Zealand have recently passed legislation that has made these two countries the fastest growing regions in the world for fiber access deployment.

This legislation and modernization push includes a target to cover 90% of Australia with fiber access, thereby replacing the existing limited copper infrastructure.

BroadLight will be working together with Braemac to distribute fiber access processors to the region, providing the smart chip required to power communication equipment, thus enabling the high quality of experience for triple-play services that subscribers' demand.

### **About BroadLight**

BroadLight is a fabless semiconductor company supplying smart processors to equipment vendors for fiber access applications around the globe. BroadLight enables service delivery with its highly integrated processors and software for central office and customer premise equipment.

A worldwide leader in fiber access semiconductor and software, BroadLight powers all the GPON deployments worldwide. For more information, please visit <http://www.broadlight.com>.
